

CSCC01: Team 10 - Deliverable 2

USER STORIES VERSION 0

Contents

1	Introduction	2
2	User Stories	3

1 Introduction

In addition to speaking with the clients about the types of users who are going to use this software, Team Bits also discussed with the clients features in the software they would like to see implemented. In this document is a set of user stories ordered by priority describing the features this software will potentially have. The users in these user stories are the same users described in Personas Version 0.

2 User Stories

- As a TEQ employee, Mike James, I want to make only authorized agency accounts able to access all of the uploaded data so that we can maintain the privacy of the organizations
- As a volunteer for agency XYZ, Sam Spongy, I want to be able to upload any of the 8 different types of iCare excel files so that the agency that I represent can contribute to the CCS program
- As a volunteer for agency XYZ, Sam Spongy, I expect that when I upload my data, all entries are automatically formatted to comply with the system's format so that I do not have to manually change any entries
- As a volunteer for agency XYZ, Sam Spongy, I want to be able to view any data conflicts (i.e. due to duplicate fields like Child 1, Child 2, etc.) or missing data when uploading, so that I can ensure that the data I uploaded is accurate
- As a junior TEQ member, James Wowman, I want to be able to view generic trend reports (graphs, maps, excel files etc.) so that I have a general picture of what trends are occurring
- As a long term TEQ employee, Louis Chan, I want to be able to create custom queries by selecting from a list of variables from a drop down bar so that I can customize the data I want to see
- As a long term TEQ employee, Louis Chan, I want to be able to make appropriate graphs (histograms, scatter plots etc.) out of my queried data so that I can visualize my data
- As a TEQ employee, Mike James, I want to have the ability to run my own SQL queries so that I am able to manipulate the data for statistical calculations
- As a UTSC Project Staff admin, Enisa, I want to be able to have the same permissions as a TEQ's staff account so that I can moderate what the TEQ needs from their perspective of their account
- As a TEQ employee, Mike James, I want to be able to remove agencies in the event that they close down so we don't have any irrelevant data
- As a UTSC Project Staff admin, Enisa, I want to be able to add data fields (columns) within the database so that the template is consistent with government standards
- As a UTSC Project Staff admin, Enisa, I want to be able to remove data fields (columns) within the database so that the template is consistent with government standards

- As a TEQ employee, Mike, I want to be able to submit a request to add or delete data fields (columns) within the database to an admin so that the template is consistent with government standards
- As a UTSC Project Staff admin, Enisa, I want to be able to receive and accept requests about data fields that wish to be changed by the TEQ staff so that I can conform to their needs
- As a UTSC Project Staff admin, Enisa, I want to be able to view all the data so that I can change the infrastructure appropriately to the client's needs
- As a volunteer for agency XYZ, Sam Spongy, I want to be able to submit a form to the system admins' email if I need help or come across any issues so that any problem that arises can be resolved
